Now is the time! Our neighbor NRG Park hosts the 51st National Football League Championship game on Sunday, February 5. Our city is filling up with Super Bowl workers, party goers and football fans with the majority arriving and leaving between Saturday, January 28 and Monday, February 6.

To help you navigate your way to and from The Woman’s Hospital of Texas campus during the height of the Super Bowl festivities, we’ve put together this transportation supplement that you can use in conjunction with the Houston Super Bowl Hosts Committee’s complete transportation guide, “Know Before You Go” Visit: http://www.housuperbowl.com/transportation

Kirby Drive:
The main impact to our campus is the closure of Kirby Drive between McNee Road/NRG Parkway and Westridge Street. That’s the entire segment of Kirby that runs in front of NRG Stadium.

Partial closures of Kirby Drive can happen at any time starting January 27 so if you use this street to get to work every day, it’s a good idea to use an alternative route before the 27th.

The full closure of Kirby Drive will happen at 7:00 p.m. on Thursday, February 2. The reopening of Kirby Drive for public use will be at 6:00 a.m. on Monday, February 6. Fannin street will be very congested with traffic from Thursday through Monday. Please plan to reroute your commute and move up your departure time during this time to accommodate the anticipated delays.

Murworth Drive:
Starting at 7:00 p.m. on Thursday, February 2 and ending at 6:00 a.m. on Monday, February 6, Murworth Drive will be closed at Lantern Point Drive, which is a block away from Murworth’s intersection with Main Street.

Alternative Driving Map on Back
Almeda Road (RED Route 1)
To avoid congestion on 288 and 610, Almeda Road is an alternative thoroughfare to get to the hospital campus. But rather than taking it all the way to the intersection with Old Spanish Trail, you can take Holly Hall Street to Knight Road and drive on Knight Road to the Fannin intersection.

Cambridge Street (BLUE Route 2)
This street stretches from Main Street to the 610 feeder road. You can use it to bypass traffic jams in the Texas Medical Center and on Old Spanish Trail. It also intersects with Holly Hall Street, which is an access point for State Hwy 288, also known as South Freeway.

Knight Road (GREEN Route 3)
This road connects to Fannin Street at the Y in Fannin in front of our hospital campus and ends at Almeda Road, also known as FM 521 Road, with an interruption in progress at the Loop 610. You can turn on the feeder road at the Loop and drive down to Fannin, make the U-turn and pick Knight Road back up on the other side of the freeway.

Coming from our campus, Knight Road is to the left of the Foundation Surgical Hospital of Houston building. Knight Road also intersects with Holly Hall Street, which is an access point for State Hwy 288, also known as the South Freeway.

Coming from State Hwy 288 and Loop 610, exit Fannin Street and turn right on to Knight Road, which feeds into Fannin Street in front of our hospital campus. You can make a U-Turn on Fannin in front of the One Fannin Building at 7400 Fannin to enter the hospital campus at the Fannin Street entrance.
